

NEW MEMBER PLAN COMPARISON

As a new SERS member, you are now enrolled in a “hybrid” retirement plan, in the A-5 class of service. That means a portion of your retirement benefit comes from a defined benefit pension plan that features guaranteed monthly payments, and a portion comes from a defined contribution investment plan and the amount of money you earn from your personal investment choices.

YOUR HYBRID PLAN – A-5 CLASS OF SERVICE

As a member of the A-5 class of service, your mandatory contribution toward your retirement benefit is 8.25% of your pay, which is split between the two plans with 5% going toward your pension and 3.25% going toward your investment plan. Your employer’s mandatory contribution toward your pension is calculated each year based on the assets and liabilities of the SERS pension fund and their mandatory contribution toward your investment plan is 2.25% of your pay. In general, the pension portion of your benefit is guaranteed to grow by 1.25% of your pay for each year you work for a SERS-participating employer. Income or loss in your investment plan is based on your investment choices and the markets.

YOUR OTHER OPTIONS

Hybrid Plan – A-6 Class of Service

If you switch to the A-6 class of service, your mandatory contribution toward your retirement benefit would be 7.5% of your pay, split between the two plans with 4% going toward your pension and 3.5% going toward your investment plan. Your employer’s mandatory contribution toward your pension would continue to be calculated each year based on the assets and liabilities of the SERS pension fund and their mandatory contribution toward your investment plan would be 2% of your pay. In general, the pension portion of your benefit would be guaranteed to grow by 1% of your pay for each year you work for a SERS-participating employer. Income or loss in your investment plan would continue to be based on your investment choices and the markets.

Defined Contribution Plan/Straight investment plan option

If you switch to the straight investment plan option, you would contribute 7.5% of your pay toward your investment plan and your retirement benefit would be determined by the amount of money you earn from your personal investment choices and the markets.

PLAN ESTIMATE COMPARISON

Pension portion assumptions: Employee works for 35 years with a final average salary of \$40,000.

Investment portion assumptions: 4%

	YOUR BENEFIT		YOUR OTHER OPTIONS
